running stitch by 10 steps

triple run by 10

cross stitch in 10 by 10 center ✓

zigzag with density 20 width 20 center ✓

Z-stitch with density 20 width 10 center ✓

satin stitch with width 20 center ✓

tatami stitch width 100 interval 40 center ✓

The stitch type affects the number of stitches in the final design.

Cross stitch density 5
(one stitch every 5 pixels, stitch pattern is 10 pixels high)

Cross stitch density 10
(one stitch every 10 pixels, 10 pixels high)

Designs can be created with different **stitch types** in the Embroidery category

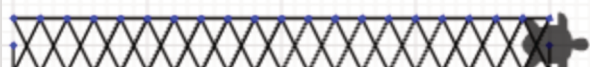

You can select between simple running stitches and more complex patterns in which you can adjust dimensions like height or width individually.

2 cm 62 stitches

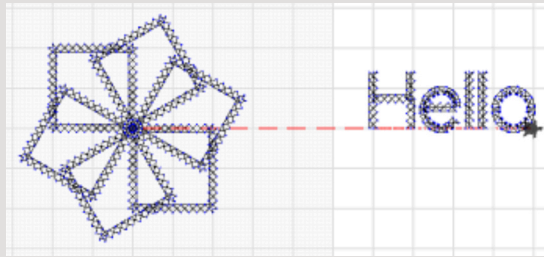

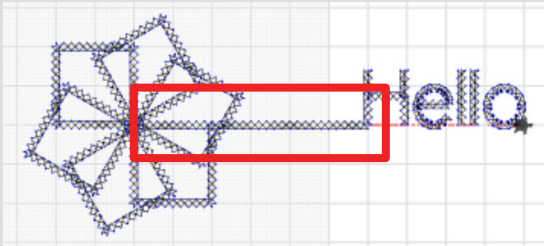

cross stitch in 5 by 10 center ✓

2 cm 32 stitches

cross stitch in 10 by 20 center ✓

Stitch Types - Jump Stitch

When working with an embroidery machine, every part of a design is always connected by thread.

Activating the **jump stitch** lets you cut out this part of the thread once the embroidery is finished.

jump stitch ☒

move 300 steps

jump stitch ☐

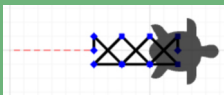

Active jump stitches are represented by a red dotted line on the stage:

jump stitch ☒

move 100 steps

When the jump stitch is deactivated, the stitch type is reset to the previously active one:
